

## Curriculum Development Team Training

### Instructional Scenario

---

**Title Ideas:** He May Know about the Stars in Space, but Computer Space Is a Different Story

**Duty/Concept Area(s):** 6670-52/Investigating Computer Fundamentals

**Scenario:**

Your science teacher keeps complaining because he cannot find his files for the SOL review. From past conversations with him, you realize this teacher is not tech savvy. You offer to help him set up a file system so he can keep his files organized.

**Big Question:**

- How are you going to identify the best filing system for your science teacher?

**Focused Questions:**

- How are you going to organize the folders?
- What should be the titles for the folders and sub folders?
- What type of files might your teacher need to find?
- How are you going to teach him to find the files in the future since there are many different ways to search files?

**SOL Correlation:**

English 9.6, 9.7, 10.6, 10.7

Computer Technology 9-12.12 A, B; 9-12.13 A, B; 9-12.16 A

**Resources:**

- Access to the teacher's computer
- Paper to draw out the file hierarchy
